extriCARE®

Effective Wound Care

The extriCARE® 3600 NPWT device is designed for use in hospitals, wound care centers, and other medical facilities. The pump features a rechargeable battery and has the ability to reach up to 200mmHg of pressure. Equipped with a rotatable back mount for securing to beds and IV poles, making it ideal for use in hospitals and other long-term care facilities. Various safety alarms are built into the system and it has an intuitive user interface. The extriCARE® 3600 pump is used in conjunction with our anatomically fitted line of wound dressings as well as our foam dressings.

Up to 24 Hours Treatment
