

Innovative Pre-emptive Care

The Devon24 is a portable Deep Vein Thrombosis (DVT) Prevention therapy device. It is fully portable and capable of delivering continuous DVT prevention for up to 24 hours while promoting patient mobility. The Devon24 is created for clinical and home care, requiring no set up and is simple to use with its one-button operation.

The Devon24 helps to enhance proper circulation of blood in the body by mimicking the body's natural muscle contractions, thus increasing venous blood flow to the patient's extremities.

*Removable/Reusable Model Available. Devon24R – device detaches from sleeves. Additional sleeve purchase required for multi-patient use. Ideal for clinical care settings.
